

Chain Gang

TOPIC: *Unity*

SCRIPTURE: *Psalms 133:1-3*

SUPPLIES: *none*

Create at least two teams with four or more people. Explain that each team will have three minutes to create the longest "chain" that can be lifted by its ends without breaking. Instruct teams to use any items on their bodies and/or items in the room, and to connect them in any way

they can think of. For example, they can remove jewelry, belts, socks, shoestrings, and other items and tie them together. When time is called, the chains should be measured for length and tested for durability. The team with the longest chain that doesn't break when lifted wins.

DISCUSSION

- What made your chain strong or weak?
- Why were some "links" of your chain stronger than others?
- How is a weak link like someone who causes disunity?
- How is a long, connected chain like a unified youth group?
