

Julio is 23 years old. He was released from jail 14 months ago after serving 9 months for larceny and a breaking and entering charge. Since his release from jail, Julio has been working as a mechanic in a garage. Neither his boss nor his fellow workers know he has a "record". Recently, some money was discovered missing from the cash register at the garage. Julio thinks that his boss has somehow found out about his record and suspects him of taking the money. However Julio is almost positive that another employee, Mike, is responsible for the missing money. Julio wants to keep his job and doesn't want to lose the friendship of the guys at work

1. Define the situation -- objectives or goals
2. What are some of his possibilities
3. Important factors/risks involved
4. Consequences/outcome of different possibilities
