Spanish-Language Characters on the Computer

There are other ways to produce Spanish-language characters on the computer, such as using Spanish word processors or changing keyboard templates, etc., but these codes are for those who write only occasionally in Spanish.

First, make sure your numerical lock is "on". (NUM LOCK)
For each character, hold down the "ALT" key while you type the indicated number ON THE NUMERICAL KEYPAD, NOT on the row of numbers on the top of the keyboard, then release, and the accented or special character will appear.

Hold down ALT, and type:	Release ALT, and you'll get:
160 or 0225	á
0193	Á
130 or 0233	é
0201	É
161 or 0237	í
0205	Í
162 or 0243	ó
0211	Ó
163 or 0250	ú
0218	Ú
164 or 0241	ñ
165 or 0209	Ñ
168 or 0191	¿
173 or 0161	¡
