

**1** Strive for excellence; try to be the best that you can possibly be. Aim for perfection instead of merely trying to "beat" others.

**2** Success without advancing the interests of our people as a whole, without helping those who have fallen behind, is worthless.

**3** The human race is one family with diverse but equal members having different cultures, and a deeper understanding of one's own culture will

inevitably lead to a better understanding of other cultures.

**4** Personal growth is the mother of greatness, but its price is pain and perseverance.

**5** Temper strength and power with gentleness and compassion; balance courage with wisdom.

**6** Don't go along to get along. Be willing to sacrifice to do what you know is right.
