

What's In Your Personality?

What do your choices say about you? Get a partner and guess out loud *with* your partner would do in each situation: "Yes" ... "No" ... or "Maybe." Give *your* self 10 points for every correct guess. Then reverse roles and let your *partner* guess about you in these situations. Total your scores to find the winner. *Lastly* complete the personality analysis at the bottom and discuss it with your partner
