

IF SHE ONLY KNEW

I started using this idea during a recent series on dating relationships and sex.

I asked the teenagers to anonymously write down the one thing they wish the opposite sex knew. (I had my adult volunteers quickly look through the responses and remove any that weren't appropriate.) Then I read them aloud to the group and we discussed them in an open and frank way. I was surprised about some of the truths that came out of this—and how unaware people can be about how their actions affect the opposite sex.
