

How to make your dreams come true!

You can make your dreams come true by following a simple six-point plan that I personally use all the time.

I'm convinced there's nothing in life you can't achieve if you really want it, and this plan will pave the way to your goal — whether it's a better job, more money, a happy marriage, a world cruise or simply being successful in life.

So here — for *Weekly World News* readers — is my plan to make your dreams come true.

● **GET STARTED.** The hardest part of reaching any goal is getting started — but once you take that first step, the odds are great that you'll succeed. For example, if your dream is to own your own business, start by designing your letterhead. If you have your heart set on a specific job that pays more money, draft a letter telling about

your abilities and experience and send it to all the companies that have that type of position.

● **EXPECT TO WIN.** Many people launch themselves toward their dream only to have their hopes dashed because they doubt that they'll succeed. Dr. Norman Vincent Peale once said, "Hope is the great power that can move you to success." When a man expects to win, he gives it all he's got.

● **IMAGINE YOUR DREAM COMING TRUE.** The power of the human mind is limitless. Picture yourself as the boss or living in that fancy house in the country, and it will make you work harder

toward achieving that goal. Whatever your dream, you will never succeed until you turn your imagination loose and imagine your success.

● **EXPECT PROBLEMS.**

Do not be surprised when you run into difficulties. If you expect them, they won't panic you. Smart people never seize opportunities without asking what problems they might reasonably expect. Just because you're trying to make a dream come true doesn't mean you should be a starry-eyed dreamer.

● **BELIEVE IN YOURSELF.**

First thing every morning, a friend of mine repeats out loud, "I believe... I believe... I believe." And he follows with, "I can... I can... I can."

That kind of thinking works wonders. It flushes negativity out of the brain right at the start of the day. It's even a good idea to repeat this two or three times a day.

● **BE PATIENT.** The road to almost every dream is dogged by periods when nothing seems to be moving forward. The danger is that we may be tempted to quit during these dreary times. I know many very successful people and all of them share the ability to be patient. You should never waver from your course just because things aren't moving ahead as planned.
