

ones work best) and distribute them at random. Have the teens stick the label on their face somewhere. Then everyone tries to find their own names on someone else's face.

When a teen finds her own name, she gets the sticker and sticks it on her shirt or coat and stays with the person on whom she found her name until that teen finds his own name. This is a good way for kids to see a lot of

Statistical Treasure Hunt

- _____ Counting January as one point, February as two points, and so on through the calendar year, add up the total of birthday points at your table. Just ask 'em what month they were born, not the year!
- _____ Counting one point for each different state named, add up your score for the birth states represented on your team.
- _____ Total of all shoe sizes added together. One foot only.
- _____ Total number of operations everyone at your table has had. Serious dental surgery counts, but not just an ordinary tooth pulling. You have time to count the number, no time for all the interesting details!
- _____ Score a point for each self-made article worn or carried by your teammates.
- _____ Add the total number of miles traveled by each member to get to this meeting

STATISTICAL TREASURE HUNT

Divide the group into teams of equal number, if possible. Give each team a list of questions that are to be answered and evaluated as indicated on the sheet. Each team appoints a captain who acts as the gleaner of information and recorder. The game can be played around tables at banquet events.

Here is a sample of typical questions and methods of scoring. You can also use other questions that may be more appropriate for your particular group or
