

# 31 WAYS TO COOL OFF

Obtain 31 dishes of the different flavors of Baskin-Robbins ice cream in the small servings (or larger if your group is large) for this event. A discount is usually available for church or youth groups.

Place the 31 different kinds of ice cream on a table in a circular fashion, placing a small spoon in each dish of ice cream. Or you may want to place a lot of plastic spoons around each dish, so that each person gets a new spoon. Then give each person in the group a pencil and a list of the different flavors.

Usually Baskin-Robbins has this list already printed up and available at no charge. Put a different number on each dish that is found on the corresponding list, and allow the kids to go around the

circle, sampling each dish of ice cream, trying to match the samples with the names on the list.

Many of the names are totally unrelated to how the ice cream tastes, so this can be a lot harder than you think. One thing's for sure: This is one of the most delicious games you'll ever play.
