

Worm Race

Divide into four to eight persons per team (obviously girls with skirts are not eligible). The team sits in a straight line. Each person wraps their legs around the person in front of them. Only the player in the front of the line may allow their feet to touch the ground. Finish line is only 10 feet from the starting point, but entire worm must cross the line. (*Leader:* You may want to separate the guys and the girls into different lines, depending on your group.)
